DELAYED DISPATCHES.

Eastern States.

NEW YORK, March 22.—A young German in Newark, being refused by a girl, shot her dead at her residence in that city, and then killed himself with the same pistol.

BALTIMORE, March 24.—An Israelite named Hirsh committed suicide yesterday by hanging himself in the Hebrew Synagogue.

NEW YORK, March 24.—Ten ladies graduated at the medical college for women yesterday.

SPRINGFIELD, Mass., March 19.—An order has been received at the Armory, from Washington, to begin the manufacture of breechloaders, and to turn out 5,000 per day.

Oregon.

EUGENE CITY, March 19.—About 4 o'clock yesterday morning the residence of Mr. Stevenson was discovered to be on fire. The basement was entirely wrapped in flames before being discovered, the family, Mr. and Mrs. Stevenson and four children, were sleeping up stairs. When the alarm was given, Miss Stevenson remained to save the children by throwing them from the window. The oldest child leaped from the window and was saved. The heat was so great that she could not get the three smaller ones from their beds; but only left them when wholly bloated. They perished in the flames. The origin of the fire is unknown. Mrs. Steve-
ton died at eight o'clock this morning from the effects of the burns.

Canada.

LONDON, Canada, March 20.—The express train on the Great Western railroad going West ran off the track at 2 o'clock this morning. The sleeping car was precipitated over an embankment twelve feet high, making a complete revolution. Nobody was killed, but some were more or less injured.

Cuba.

HAVANA, March 23.—The Captain General to-day held a grand review of all regular and volunteer forces in Havana. He was enthusiastically cheered by the volunteers. Troops continue to be sent to the interior.

The *Nassau Herald* reports the capture of the brig Mary Lowell at Ragged Island by the Spanish man-of-war Andalucia. The brig at the time of the capture, was in possession of the British Consul-house officer. The British war steamer Cherub sailed for Ragged Island to investigate the affair. The Havana Government is fully advised of the conduct of the Commander of the Andalucia.

The Peruvian monitors remain at Ragged Island. During their voyage one of the ships broke loose, ran into the steamer Havana and sank her.

California.

SAN FRANCISCO, March 20.—A grand velocipede tournament took place at the Mechanics' Pavilion last night. About 20 mechanics entered for the race. Alfred Gardner won the prize for good riding, by running 2,240 feet in less than one minute and forty-eight seconds. The slow race was won by R. Cartsey, who ran 560 feet in four minutes.

The small pox is slightly on the increase again. Twenty-eight cases were reported last week, an increase of twelve over the preceding week.

Forty-five thousand dollars were paid to the Collector of Customs yesterday, being the proceeds of sale of confiscated opium.

To the Citizens of the Pacific Coast.

Charges derogatory to my character have from time to time appeared in the *Oregonian* and the *Portland Herald*, and have been copied and recopied in low and scurrilous sheets like the *Vancouver Register* and *San Francisco Chronicle*, and commented upon by them and others of "small calibre" in Washington territory and Oregon. As to the last named papers, the venom from a whole regiment with neither brains or cash, would not injure the reputation of any one, and therefore I shall not worthy of notice; and therefore I shall reply to charges appearing in the former.

First, the public will understand that the charges all originated by one man, and he a former partner of mine in the Insurance business. I never used the name of Wilson A. Emerson; never knew a lady by the name of Chase in Indiana, as reported; never was but once married and that same eight years ago, to my present wife. And as far as being arrested for bigamy, escaping bonds, etc., etc., I can say with a clear conscience that neither warrant nor summons was ever served on me to my knowledge—and facts are developing which will prove it to be a most villainous conspiracy concocted by rival insurance agents against an honest competitor whose business success is the sole cause of their shameless vindictiveness.

As to my course on Puget Sound, I was duly appointed Inspector of Customs by Rufus Leighton, Special agent of the Treasury Department, and also by W. E. Barnard, Deputy Collector at Port Townsend, but was to act in the capacity of special detective, and therefore took the name of Wright, which is the only alias I ever had. As to the seizing goods on the Sound, Mrs. Fitzgerald did not molest any one or their goods, but I did. I seized what I supposed to be smuggled and delivered it to Mr. Barnard at Port Townsend, and in doing so I did not overreach my orders, but I did my duty as I would again under similar circumstances, which my record will show at the War Department in the 9th Ar My Corps, 1st Michigan Sharpshooters. Copies of my appointment and a receipt from the Union Mutual Life Insurance Company I publish here with kindly ask that those papers that have participated in the attack will give this one insertion at least, as justice to me and courtesy on their part. As to the originators of these foul slanders against an innocent man and family, I trust the plan of salvation will be so stretched and elongated as to cover their black and infamous crime.

VICTORIA, Feb. 19, 1869.
To Whom it may Concern: This is to certify that the bearer has been duly appointed as Inspector of Customs for a special service in Puget Sound District, and has the power to search suspected places or persons; make seizures in any manner he may deem expedient to protect the Revenue from fraud.

(Signed) RUFUS LEIGHTON,
Special Agent of Treasury Dept.,
Port Townsend, Feb. 19, 1869.
Mr.—Sir: You have been duly appointed Inspector of Customs under the direction of the Special Agent of the Treasury Department. Your compensation will be four dollars per day and expenses, while traveling on official duty.

W. E. BARNARD,
Deputy Collector,
Port Townsend, W. T.

P. S.—My bill for service and expenses have not been paid. Payment was refused, not for neglect of duty, but because it was found out that I had changed my name and was published (the reason for so doing I heretofore explained, but knowing that the Government that I periled my life for, for four years will abundantly compensate me not only for my services in seizing smuggled goods, but showing where a leak can be stopped, now running from the Treasury, I cheerfully transfer my claim to headquarters and will give the Department a peep behind the curtain as to the collection of customs in the Puget Sound District.

SAN FRANCISCO, Dec. 10, 1868.
Whereas, the Union Mutual Life Insurance Company, of Maine, did on the 15th day of June, appoint R. F. Fitzgerald, general agent for California, and the said Fitzgerald proposes to surrender the said contract as his interest therein for the sum of fifty dollars in gold coin, and a release from all obligations at the San Francisco agency; now, therefore,

Know all men by these presents, That we, the Union Mutual Life Insurance Company do release and forever discharge the said Fitzgerald from all debts, dues, obligations or sums of money whatsoever; and it is mutually agreed that this is an amicable and satisfactory settlement.

(Signed) J. W. JUDD,
Agent and Attorney.

Witness: J. W. G. PARSON.

So fails to the ground the assertion that above company discharged me, or that I swindled them.

Oregon, California and British Columbia papers please copy.

Truly and respectfully,
R. F. FITZGERALD,
Portland, March 23d, 1869.

"Wild" Theory of Terrestrial Changes.

The London Daily News of January 12th says:—

While contemplating with feelings of awe, the devastations occasioned by such terrible phenomena as the Peruvian earthquakes, we had consoled ourselves with the consideration that after all these occurrences served a useful and important purpose. But for them, we reasoned, the continents of this globe would long, since have crumbled beneath the incessant action of the sea. "Time enough has elapsed," says the young engineer, "to have long ago destroyed every vestige of land, and force enough directed to that end has been in activity."

But it seems, if we can trust to the theories recently put forward by Rev. Mr. Wild, a Canadian clergyman, that we are threatened with a misfortune of a different kind; "coral insects" will fill up the Pacific with solid habitable land, he tells us, "and eventually the globe will be all land, or at least the sea will be no more sea." After this we hear with complacency that "there will be perpetually equal day and night of twelve hours each all over the globe;" though otherwise this change, accompanied as it must be with a loss of the usual seasonal changes, would have been rather a serious calamity. It may be that we are now being put through a process of training whereby we may be enabled to endure with the less discomfort the promised change; for we should only a little more inconvenienced by an absolute want of seasons than we are at present by their abnormal character. Mr. Wild also announces that "there will be only one language spoken throughout the world and that language will, of course, be English." Possibly a Frenchman or a German might demur to this conclusion; but we, of course, have nothing to say against it. The energy which men nowadays devote to learning foreign languages will probably be utilized in future in the endeavor to overcome some of the difficulties suggested by the want of water.

Doubtless, like most theorizers, Mr. Wild can bring forward irrefragable arguments in favor of his views, otherwise we might be disposed to notice a few difficulties in it. Where, for example, should as is all the sea water go to? If coral polyps fill up the bed of the Pacific, one might expect that the water would flow over in a perfect circle. Is the whole aqueous mass to be contained in one vast reservoir?

As to my course on Puget Sound, I was duly appointed Inspector of Customs by Rufus Leighton, Special agent of the Treasury

Department, and also by W. E. Barnard, Deputy Collector at Port Townsend, but was to act in the capacity of special detective, and therefore took the name of Wright, which is the only alias I ever had. As to the seizing goods on the Sound, Mrs. Fitzgerald did not molest any one or their goods, but I did. I seized what I supposed to be smuggled and delivered it to Mr. Barnard at Port Townsend, and in doing so I did not overreach my orders, but I did my duty as I would again under similar circumstances, which my record will show at the War Department in the 9th Ar My Corps, 1st Michigan Sharpshooters. Copies of my appointment and a receipt from the Union Mutual Life Insurance Company I publish here with kindly ask that those papers that have participated in the attack will give this one insertion at least, as justice to me and courtesy on their part. As to the originators of these foul slanders against an innocent man and family, I trust the plan of salvation will be so stretched and elongated as to cover their black and infamous crime.

VICTORIA, V. I., BRITISH COLUMBIA, TUESDAY MORNING, MARCH 30, 1869.

A THIRD CALL OF TWENTY-FIVE Dollars per share in the above Company is payable at once to J. KREMLER, Secretary.

IN THE SUPREME COURT OF CIVIL JUSTICE, V. I., IN BANKRUPTCY.

Thos. Mann and Malcolm Munro, Bankrupts.

THE ABOVE-NAMED BANKRUPT,

MALCOLM MUNRO, will appear before His Honor Chief Justice Noodham on Wednesday, the 31st day of March instant, at 12 o'clock noon, at the Court House, James Bay, to pass his final examination.

ROBERT BISHOP, Solicitor.

Dated 17th March, 1869.

TO ALL WHOM IT MAY CONCERN,

NOTICE IS HEREBY GIVEN THAT Letters Patent under the Great Seal of this Colony, bearing date the thirteenth day of February, A. D. 1869, (filed in the office of the Colonial Secretary), have been granted to the Plaintiff, George A. Emerson, and his wife, Anna, of Boston, Massachusetts, and Theodore Augustus Bishop of San Fran-

cisco, California, for the protection and exclusive privilege of manufacturing, vending and selling, &c., a certain submerged Water Pump, descriptions and drawings of which have been filed in the office of the Colonial Secretary, and that legal proceedings will be taken against any person manufacturing, vending, or selling the said submerged Water Pump, or otherwise infringing the rights or privileges conferred by such Letters Patent without the license in writing of the Plaintiff.

THE GRAND PROMOTERS OF HEALTH.

HOLLOWAY'S PILLS.

The grand secret of attaining happiness is to secure good health, without which life is stripped of its pleasure.

We fear lest it should in this case be converted into steam, and burn the terrestrial globe into fragments. Such a result seems inconsistent with Mr. Wild's other views, besides being in itself rather unpleasant to contemplate. We trust Mr. Wild will relieve us from our anxieties, or that the Wild theory will gravitate to its final basis.

Medical.

QUEEN CHARLOTTE COAL MINING COMPANY (Limited).

THE UNDERSIGNED BEING UNFOR-

LUATELY a shareholder in the abovesigned Company, disclaims all connexion with the system adopted by the Directors for obtaining tenders for works. He hereby expresses his opinion that the persons tendering in answer to the public advertisement, were very un-

fortunate to be chosen, and one of the directors, who had a large interest in the works, was repre-

sented to the shareholders as the person who had got the contract; and he takes with him to the works a person who was foreman to another Director (No. 2), and the shareholders are

THE BRITISH COLONIST.

Tuesday Morning, March 30, 1869.

In a previous article we pointed out, that during the year 1868 there were imported into this Colony fifty-five tons of butter, two thousand tons of cereals, three thousand five hundred head of cattle, the cost of which amounted to three hundred and fifty thousand dollars! We likewise asserted that it would require about five square miles of cultivated land to produce the grain; one thousand more cows to yield the butter, and a couple of miles more land cultivated to feed them, thus showing how good an opening there is for agricultural settlers in Vancouver Island and upon the banks of the Lower Fraser. The same Custom House returns of 1868 make us acquainted with the fact that in addition to the above twenty-five tons of cheese were supplied at a cost of eight thousand dollars, and that we bought forty-five tons of lard for nine thousand dollars! Not satisfied with this, seventy-eight tons of bacon and hams were sent in, the yield of six hundred hogs, for which twenty-one thousand dollars were charged, and in addition three hundred and fifty living pigs were landed, adding four thousand five hundred dollars to the sum. For two hundred and fifty tons of hay, which one hundred and fifty acres of land would have yielded, we gave to some foreigner four thousand five hundred dollars, and to a similar source we presented nearly five thousand dollars for four tons of hops, which ten acres of our own soil would have yielded had it been cultivated. As we did not supply the brewers with all the hops, so likewise they imported sixty-five tons of malt; the only consolation to the Colony being that it leads to the belief that the beer consumed is made with hops and malt, and not with strychnine, broom or gentian. Somebody eats oatmeal, as thirty tons were imported, the charge therefor being more than three thousand dollars. Not satisfied with getting our beef from abroad, we chose additionally to import from thence thirteen thousand sheep and give for them fifty-seven thousand dollars! What a liberal, good natured people we are—to others! We sent abroad, then, during the year 1868 no less a sum than four hundred and sixty thousand dollars for articles of food, every one of which can and ought to be produced in our own country! and for this privilege we paid in addition \$76,000, that being the amount of Customs' duties received upon those articles comprised in the above \$466,000—altogether more than half a million of dollars! Suppose the consumers to number two thousand, it is equal to \$25 per head per annum for almost the actual necessities of life only. Can we give any better proof of the advantages this Colony holds out to agricultural settlers? Agriculture is the one business which anyone may persuade an expert friend to enter upon without having any fear that he will subsequently be abused for so doing. The farmers are prosperous—there is plenty of room for more who, with ordinary knowledge of the business and industry, must become so likewise. Suppose a farmer to produce by his own labor \$1000 worth per annum; it follows that were four hundred men to cultivate the land and stock it, they would have a remunerative home market for everything they raised, if of good quality. If even the cattle and sheep be left out, it would require two hundred men to raise the cereals, etc., necessary to supply our absolute wants at home at the present moment! Surely, then, there ought to be no hesitation in inviting a farming people to our shores—it is to the advantage of all to do so. We have confined ourselves to our actual requirements at home at the present moment; but there is really no reason why this Colony should not raise articles for exportation likewise; and having this in view, our millions of acres will bear millions of people—and the sooner we say so, get them and keep them, the better for all.

A MISTAKE OF FOUR MILLIONS.—A somewhat important error in our measurement of the sun from the earth has been discovered. It is now proved that we have been accustomed to over-estimate the distance by four millions of miles, and instead of ninety-five millions of miles the real figure is ninety-one. The discovery is credited to Mr Stone of the Royal Observatory at Greenwich, England. Is it not probable that the earth and sun are gradually drawing nearer to each other? There are persons who profess to believe that ultimately our earth will plunge into the orb of day and be consumed. We patiently await the result.—*Scientific American.*

The steamer Eliza Anderson arrived last night at 12 o'clock, with her usual freight and passengers.

By Electric Telegraph.

SPECIAL TO THE DAILY BRITISH COLONIST

LAST NIGHT'S DISPATCHES**Eastern States.**

CHICAGO, March 27.—Secretary Boutwell has notified city female clerks that they would be discharged at the end of the month. He is instituting a thorough inquiry into the state of the Departments of the Treasury.

The recent order mustering out twenty infantry regiments will save the Government fifteen millions annually.

Secretary Fish declines to receive Lenois, the Minister of the Cuban Insurgent Government in an official capacity, Lenois will appeal to Congress. No nomination of President Grant's has yet been rejected.

CHICAGO, March 26.—A Washington special says, yesterday the House Committee on commerce voted to report with amendments the Senate bill to protect the fur-seals, after a stormy debate. There is small chance of the bill passing both Houses the present session.

WASHINGTON, March 28.—The National Executive Committee of colored men last night discussed a memorial to heads of departments, setting forth the claim of colored people to a portion of the Government patronage, on the ground of their services in this war and in the subsequent election, and asking that positions be given them. No action was taken.

CHICAGO, March 28.—The Times' special thinks the public debt statement will show a reduction of about \$7,000,000.

Three ironclads are ordered to the West India station, as the Cuban question of independence is gradually developing.

Despatches from the Consul General at Havana report the situation unchanged. It is by no means certain how matters will terminate. Both parties profess confidence in success.

The special Commissioners of the Central Pacific Railroad, who have seen both roads, deem the Central Pacific as incomplete as the Union. A despatch just received says the track of the Union Pacific is laid 25 miles from Ogden, and the grading between there and Mountain Point is completed except 6 miles. The Central have laid to 75 miles west of Mountain Point, leaving a gap between the roads of 126 miles.

NEW YORK, March 27.—Surgeon Norris telegraphs to-night that ex-President Johnson suffered intensely from neuralgia and calculus, but is relieved, however, and is up again.

NEW YORK, March 29.—The accredited agents of the Cuban insurgents are earnestly laboring with Congress to secure some recognition. It is announced that an office will be opened here this week for the sale of insurrectionary bonds.

The Union Pacific Railroad Co completed 1076 miles west of Omaha, leaving a gap of only 126 miles between the ends of the two tracks.

Japan.

NEW YORK, March 27.—The Pacific Mail Steamship Co's steamer Hermann was totally lost seventy miles north of Yokohama with Japan troops on board.

Europe.

PARIS, March 26.—Several large public meetings were held here yesterday and three persons arrested for sedition speeches.

NEW YORK, March 28.—The Herald's special advices from Spain render it certain that Montpensier will be proclaimed King. He will arrive in Spain within a fortnight.

PARIS, March 27.—The Gaulois states that Napoleon has demanded an explanation of the King of Prussia in regard to the recent mobilization of troops in the western provinces.

ATHENS, March 25.—Partidas Bey, the Turkish Envoy and Minister Plenipotentiary, has arrived from Constantinople and resumed amicable relations in behalf of Turkey with the Greek Government.

South America.

NEW YORK, March 27.—Rio Janeiro advises state that the Paraguayans, at a recent meeting in Ascencion, adopted a petition praying the allies to form a Provisional Government with Ascencion for the Capital.

California.

SAN FRANCISCO, March 28.—The steamer Great Republic brings additional particulars of the wreck of the steamship Hermann which was lost Feb. 13th on an unknown reef, about forty miles north of Cape King. Mr. Chase, first officer, Mr. White, water tender, 20 Chinese (the crew) and about 250 Japanese passengers were drowned.

New York quotations—Gold 131.

Wheat in New York is in good demand; prices advanced to \$1.65 @ 1.67. New wheat is held at \$1.70.

Cuba.

HAVANA, March 27.—The steamer Couradito, which left here on Tuesday for Cardinas, was seized by a number of passengers who proved to be patriots. They are supposed to have taken the steamer to Nassau.

The report published a few days since of a heavy battle fought between the government troops and the insurgents in the Eastern Department, on the road from Penjijous, is untrue. It was only a slight skirmish.

The G. S. Wright will go to Ocean Island to-day and take in a cargo of lime for Portland.

New Advertisements.**THEATRE ROYAL****FAREWELL PERFORMANCE**
BY THE
Officer Amateurs**H. M. SQUADRON,**

CURE AND COMFORT FOR THE BED-RIDDEN.

—BY—

Holloway's Ointment.

This wonderful Ointment acts like magic in relieving all your aches; without heat, fumes, or smoke, it soothes and refreshes the skin; when rubbed on the surface it penetrates and relieves each flesh of its passage, and exerts the most wholesome influence over the internal structures. It heals by drawing together parts which were in contact, and thereby promotes sound and permanent cure.

Gout and Rheumatism.

To sufferers from the aching pains of rheumatism and Gout this ointment will prove invaluable. After treatment with warm water the soothing action of this Ointment is most remarkable. It gently removes the inflammation, ease pain, reduces swelling, restores natural circulation, and eases the disease. For the above complaints Holloway's Ointment and Pills are infallible specific.

Diphtheria, Bronchitis, Sore Throats, Coughs and Colds.

This class of diseases may be cured by well rubbing the Ointment three times a day, upon the throat, chest and back of the patient. It will soon penetrate and give immediate relief. In all stages of Influenza, Colds and Bronchitis, this treatment will follow with efficiency and safety—indeed, it has never been known to fail.

All Varieties of Skin Diseases, Scrofula and Scurvy.

This Ointment is a certain cure for Ringworm, Scurvy Scrofula or King's Evil, and the most inveterate skin disease to which the human race is subject. They cannot be treated with a salve or unguent more rapidly than Holloway's Ointment, assisted by his prepared Pills, which act upon every part of the constitution and absorb the blood so that these disorders are completely eradicated from the system, and a lasting cure obtained.

Dropical Swellings.

For the removal of these dangerous and stealthy complaints which frequently appear as slight uneasiness or a feeling of unease, of which little or no notice is taken until they begin to swell. The cause of the evil must be looked for in the liver and stomach, therefore set to work at once. Holloway's famous Ointment will remove the two principal disturbances and purify the body more effectively over the pit of the stomach, and right side where those organs lie. Most dropical cases will readily yield to the combined influence of the Ointment and Pills.

Piles, Fistulas, and Internal Inflammation.

These complaints are most distressing to both body and mind, as they do not only distract the mind from the knowledge of the true state of affairs, but also render the body unable to sustain its natural functions. Holloway's Ointment and similar complaints when they appear, will be removed with instant relief, and effect a cure without the annoyance of explaining their names to anyone.

Disorders of the Kidneys, Stones and Gravel.

Are immediately relieved and ultimately cured if this Ointment is well rubbed twice a day, into the small of the back. Over the regions of the kidneys to which it will readily penetrate, and in almost every case give immediate relief; but perseverance will be necessary to effect a complete cure.

Both the Ointment and Pills should be used in the following cases:

Bald Legs, Cancer, Scabs, Bald Breasts, Contracted Joints, Sore Nipples, Sore Throats, Skin Diseases, Ulcers, Tumours, Wounds, Yaws, &c.

Sold at the Dispensary of PROFESSOR HOLLOWAY 144 Strand (near Temple Bar), London; and by all the principal Druggists in the metropolis throughout the civilized world, at the following prices: £1 12s, 28s, 18s, 12s, 11s, 22s, and 33s each Pot.

Y. H. AYER'S considerate by taking the larger size.

Directions for the guidance of patients in every respect are added to each box.
